To da! Here you go. Nice job!

I've attached the phthalate protocol because I wanted you to see some of my FYI comments on it. Nothing that will impact HBCD but some items to consider for next (NEW) application of RoB. Thus, I added Andrew to distribution list.

Subject: HBCD protocol

Kris and all,
Attached please find the draft HBCD protocol. Kudos to April and Laura for turning this around so quickly. Also attached is the current version of the protocol template. The protocol template can also be found on the following sharepoint site:

Ex. 6 Internal Web Address

As you've been forewarned, there are a number of comment bubbles in both documents with questions that we encountered as we applied the template to HBCD. If a question applied generally to the boilerplate text from the template, or if we thought text would benefit from some clarification, we've provided those questions/edits in the protocol template as well.

Catherine and Beth – we're copying you since it might be appropriate for the SRWG to weigh in on some of the comment bubbles or proposed edits on the protocol template. Let us know how you want to

handle future revisions. At this point, we using the version on the sharepoint site to collect comment from those working on applying protocols (though I think the HBCD team is the only assessment team so far to provide comments on the protocol template).

We look forward to your feedback!

Thanks,

Sue
